

## Meet Sara Schroerlucke

*Sara and her son David*

### *Certified Feng Shui Practitioner*

**I** remember as a little girl asking my mother to change my room around, buy me a new bedspread and/or paint my room. All I knew is that when she did these things for me, I felt like new and energized. My space either at home or at my office has always been very important to me. We were actually changing the energy flow. Little did I know that all along we were “feng shuiing” my personal space. Now, as an adult, I recognize the synchronicity of my actions. Feng Shui has supported me in changing my life with its intention and energy flow/placement.

As you know, Feng Shui isn't a superstition; it is a proven practice of improving your everyday life. Feng Shui is all about bringing in harmony through balance into our lives. The home and the environment are all part of who we are and what we express. Learning and using Feng Shui will build and expand on everyone's desire of improving any life aspect by enhancing how we live, and become more prosperous and successful.

The goals of Feng Shui are to manip-

ulate the flow of Chi or energy in our home or working place and to improve the balance and harmony in our environment. The objects we surround ourselves, and how we arrange our space have a strong influence on our harmony and balance. Therefore, it is of up most importance that we ensure the continuous flow of chi in our environment at all times. Essentially, Feng Shui is about energy and change.
